

# InnoCare Urologics

A NEW STANDARD OF CARE

## UNMET CLINICAL NEED

Over 13M indwelling Foley catheters are prescribed in the US annually to patients at high risk of pulling out their catheters. Each year, close to 1M of these Foley catheters are inadvertently pulled out, leading to infection, injury, and \$4.5 billion in costs.<sup>1,2</sup>

## PATIENT RISK FACTORS<sup>3</sup>

Many risk factors are associated with patients at high risk of inadvertent catheter pullouts, such as those with altered mental status, Alzheimer's, dementia, and delirium.

## THE EGRESS™ SAFETY CATHETER

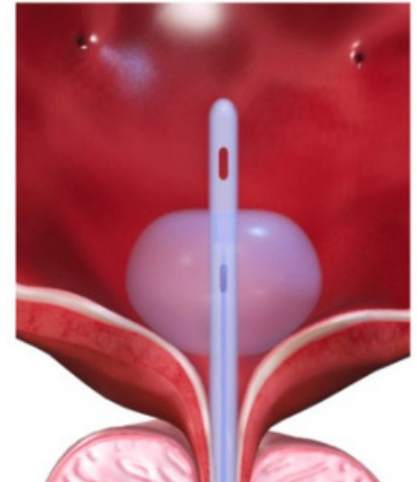

InnoCare's Egress Safety Catheter is a breakthrough in patient care as the first indwelling safety urinary catheter that automatically deflates if pulled out with the balloon inflated.

## PRODUCT FEATURES

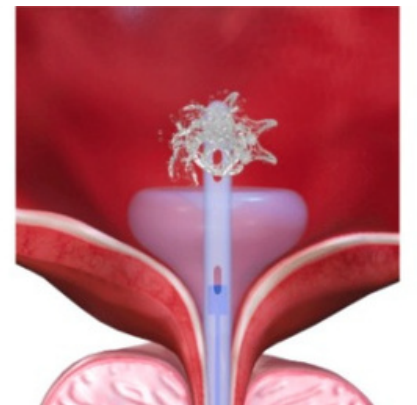

- Automatically deflates if inadvertently pulled out.
- FDA cleared with brand-new safety product code.
- Same look and feel as a standard Foley catheter.
- No additional supplies or preparation required.

## SPECIFICATIONS

- Available as straight and Coudé tip shape
- Silicone, 2-Way
- 16Fr
- 10mL

**CATHETER IN PLACE**

**AUTOMATIC DEFLATION  
WHEN PULLED**
